

EDUCATION

Masters of Science - Computer Science <i>Florida International University</i>	Starting Summer 2026 - <i>Miami, FL</i>
Bachelor of Arts - Computer Science <i>Florida International University</i> • Dean's List	Jun 2022 - Dec 2025 <i>Miami, FL</i>

SKILLS

Frontend	React Next.js TypeScript Rust Python Tailwind CSS Shadcn UI
Backend / Infra	REST API PostgreSQL Stripe Clerk Groq API (LLaMA)
Tools	Git/GitHub CI/CD Vercel Claude Code Figma
Languages	English (Fluent) Spanish (Fluent)

EXPERIENCE

Kontaktsource <i>Fullstack Developer Intern</i> • Modernized a legacy WordPress platform by migrating it to a responsive, component-based frontend using JavaScript and Tailwind CSS, improving maintainability and iteration speed. • Engineered a performance-focused UI overhaul that reduced bounce rates and directly contributed to a 13% increase in client acquisition and 60% boost in user engagement. • Led architectural design and execution for a three-developer team during an end-to-end platform rewrite; defined Git workflows, reviewed pull requests, and enforced code quality standards. • Gathered and translated requirements from 70+ clients into technical specifications, prioritizing and delivering solutions that addressed core usability and performance issues.	Jun 2025 - Aug 2025 <i>Miami, FL</i>

PROJECTS

Jump <i>Vim-inspired Terminal Navigation Tool</i> • Built Rust CLI with TUI enabling rapid filesystem traversal via deterministic two-character key sequences instead of cd. • Architected dual-character labeling (256 combinations) using home-row keys, optimizing for sub-second navigation. • Developed cross-platform TUI with ratatui/crossterm for Linux, macOS, WSL, Windows; handles raw terminal mode and signal recovery. • Built CI/CD pipeline deploying versioned binaries to GitHub Releases (Rust, Ratatui, Crossterm, React).	Feb 2026 - Present
SpotBuds <i>Spotify Analytics Platform</i> • Built a Spotify analytics platform with interactive Recharts visualizations, OAuth 2.0 authentication, and real-time data synchronization. • Architected PostgreSQL database schema with Prisma ORM and Neon serverless database, implementing relational models for users, stats, follows, and sessions. • Developed social discovery features including user search, profile viewing, and recently played tracks sharing, with RESTful API endpoints and efficient caching using TanStack Query. • Created playlist generator with Spotify integration, customizable stat cards, and data export (JSON/CSV), built with React, Next.js, TypeScript, Tailwind CSS, Prisma, Neon, and TanStack Query.	Sep 2025 - Dec 2025
Macrotrue <i>AI-driven SaaS Platform</i> • Built full-stack SaaS with Next.js, React, and Tailwind CSS, architected RESTful API endpoints with custom rate limiting. • Integrated Groq API (LLaMA 3.3) for AI-driven meal recommendations and pantry chatbot, processing user calorie goals with 95% accuracy. • Implemented subscription billing with Stripe Checkout, managing tiered access (starter/premium/pro) and usage tracking. • Designed PostgreSQL schema using Drizzle ORM with relationships for users, workouts, subscriptions, and goals; deployed on Neon. • Built secure authentication with Clerk, implementing custom CSP headers and protecting 8+ authenticated routes.	Jan 2025 - Jan 2026
